

Amendments to the Specification:

Please replace the paragraph on page 14, lines 10-16 with the following amended paragraph:

At first, as shown in FIG. 7A, a substrate 34 is placed and fixed on a printing base 60. After that, a frame 64 of the screen mask 10 is rotatably fixed to a support section 62 which is provided on the printing base 60. A holding adjusting mechanism included in the support section 62 is adjusted to position the screen mask 10 and the substrate 34.
